PROFESSIONAL SUMMARY

Junior Frontend Developer who builds responsive web applications with Next.js, TypeScript, and React, including a personal finance app, a property search platform, and a portfolio website. Completed a four-month fullstack attachment at Makueni Tech and Innovation Hub, building accessible government-facing websites with React. Experienced with REST APIs and Docker. Holds a Diploma in Computer Science and is fluent in English.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3
Frontend: Next.js, React, Tailwind CSS, TanStack Query, Responsive Web Design, Accessibility (WCAG 2.1), UI/UX Design, Figma
Backend and Data: Node.js, Express.js, Nest.js, REST API Development, MySQL, PostgreSQL, MongoDB
Tools and Practices: Git, GitHub, Docker, Docker Compose, Linux, Agile Methodologies, Debugging

PROFESSIONAL EXPERIENCE

Attachee, Fullstack Developer | Makueni Tech and Innovation Hub | Feb 2026 – May 2026

- Built and maintained government-facing websites with React and Node.js, meeting WCAG 2.1 requirements and reaching 95% Lighthouse accessibility scores.
- Developed a sand mining sites tracker with React and MySQL that lets 12 county officials monitor 50+ sites, improving regulatory compliance by 30%.
- Containerized a full-stack application with Docker, cutting deployment time by 40% and removing environment-related production issues.
- Implemented REST APIs handling 1,000+ daily requests with average response times under 200ms.

PROJECTS

MoneyMate: Personal Finance Management Application
Next.js, TypeScript, React, HTML, CSS | github.com/BYTECODENINJA/moneymate

- Built a personal finance web application with Next.js and TypeScript that lets users track expenses, manage budgets, and monitor financial activity.
- Designed responsive layouts and structured the front end for scalability, with attention to usability and accessibility.

RentoSearch: Property Search Platform
Next.js, TypeScript, React, HTML, CSS | github.com/BYTECODENINJA/RentoSearch

- Developed a property search platform with Next.js and TypeScript where users can explore rental listings and find suitable housing.
- Focused on responsive design and intuitive navigation to make searching listings faster and clearer.

JosephMulwa13: Personal Portfolio Website
Next.js, TypeScript, React, HTML, CSS | github.com/BYTECODENINJA/josephmulwa13

- Developed a portfolio website with Next.js and TypeScript presenting my experience, projects, and contact information.
- Built responsive layouts with a clean interface and attention to performance.

Property Rentals Platform
Tailwind CSS, MySQL, JWT

- Designed and launched a property listing platform connecting 100+ Kenyan landlords and tenants, with search filtering by location, price, and property type.
- Implemented JWT authentication with role-based access control for 200+ registered users across separate owner and renter dashboards.
- Optimized MySQL queries with strategic indexing, reducing search response time from 1.2s to 150ms across 5,000+ listings.
- Built a fully responsive UI with Tailwind CSS, achieving a 98% mobile usability score across device sizes.

Nexivent: Event and Ticket Management Microservice

Microservices, Apache Kafka, Docker Compose

- Built an event management system on a microservices architecture designed to support 10,000+ concurrent users.
- Implemented Apache Kafka for decoupled service communication, achieving 99.9% message delivery reliability.
- Containerized the development environment with Docker Compose so 5+ developers could work from identical setups.

Easy-Auth: Role-Based Authentication System

JWT, REST API, Swagger

- Developed a production-ready authentication API with a dual JWT strategy (10-minute access tokens, 7-day refresh tokens).
- Implemented role-based access control (user and admin) with decorator-driven guards on 15+ protected endpoints.
- Added rate limiting (5/min on login, 3/min on forgot-password) and Swagger documentation at /api/docs.

EDUCATION

Diploma in Computer Science | Cooperative University of Kenya | 2024 – 2026

Relevant coursework: Database Management, Computer Organisation and Architecture, Operating Systems, Data Structures and Algorithms, Object-Oriented Programming

- Completed advanced coursework in computer networking and system design.
- Undertook capstone projects focused on end-to-end application development, including database normalization and RESTful API architecture.

CERTIFICATIONS

- Web Development, East Tech College
- Introduction to AI Agents, AMD ROCm
- SQL (Basic), HackerRank
- JavaScript (Basic), HackerRank
- Problem Solving (Basic), HackerRank

LANGUAGES

English (Fluent), Swahili (Fluent), German (Conversational)
